

Second vocabulary list

Agonists

alcohol

Amphetamine

anandamide

Antagonists

Apomorphine

apoptosis

autoreceptors

Benzodiazepines

cannabinoid receptors

CB1

cell adhesion molecules (CAM's)

cell migration

cell-autonomous factors

chemotropic guidance

Conditioned Compensatory Responses

differentiation & maturation

Dose-Response Curve

Down-regulation of receptors

Electrical Self-Stimulation

epigenetics

extrinsic factors

Glucocorticoid receptor

growth cones

Heroin

Huntington's Chorea

Incentive Saliency

intrinsic factors

Kallmann's Syndrome

Liking vs. Wanting

marijuana

MFB

Moral Model
MPTP
naloxone
neural tube
neurogenesis
neuronal induction
Nicotine
notochord
Nucleus Accumbens
Phenylalanine
Phenylketonuria
Physical Dependence Model
Psychomotor Activation
Reward Models
Sensitization
Sites of Action
synaptic remodeling
synaptogenesis
THC
Tolerance
Withdrawal
